

LIST
of Program Proposals for funding within the Millennium Challenge Account

Proposed program	Main Program Components	Expected outcomes	Initiator	Financing request
1. Support to education, social protection and health care systems	Implementation of programs in line with PRSP priorities in the following sectors: education, health and social protection	Enhanced efficiency of education, social protection and health care systems	Ministry of Education and Science, Ministry of Health, Ministry of Labor and Social Issues	60 ml USD
2. Construction of an integrated social services center “Under Single Roof” in all marz centers and former regional centers (raions)			RA Ministry of Labor and Social Issues	
3. Production of orthopedic, prosthetic and life-facilitating devices			RA Ministry of Labor and Social Issues	
4. Creation of a hospice center			RA Ministry of Labor and Social Issues	
5. Creation of day centers for children without parental care in those marzes where such centers do not exist			RA Ministry of Labor and Social Issues	
6. Provision of housing (without right of ownership) to persons with many children and persons raising 4 and more under-age children			RA Ministry of Labor and Social Issues	
7. Establishment of integrated social services centers in all the RA marz centers		Improved quality of social and health-care services provided to the population, increased access to social services and information, minimized	RA Ministry of Labor and Social Issues	5.9 million USD

		misfeasance in the social services sector, increased opportunities for exercising social rights for the most socially vulnerable groups of the society		
8. Upgrade of irrigation systems	<ul style="list-style-type: none"> ---Construction of gravity feed systems ----Restoration of Ararat plateau's collector-drainage systems ----Restoration of primary and secondary systems ----Restoration and reconstruction of pump stations and wells ----Restoration of internal networks 	30% reduction of irrigation-related maintenance costs and increased water supply to 50 % of irrigated areas	State Committee for Water Resources	220 ml USD
9. Construction of dams	<ul style="list-style-type: none"> ----Completion of unfinished constructions (the three most significant ones can be identified) ----Construction of new dams (project estimates are available) 	Increase of the irrigated areas up to 20% of the currently irrigated lands and increased water supply to more than 50 % of irrigated areas	State Committee for Water Resources	270 ml USD
10. Water supply (potable water) and water removal	<ul style="list-style-type: none"> ----To upgrade external water supply systems- reconstruction and construction of water treatment stations, pump stations, chlorine stations, capping, replacement of pump stations by gravity feed systems ----To upgrade distribution networks- restoration of water lines, wells, network reconstructions related to zoning, construction of new networks ----Restoration of sewage treatment stations 	Resolution of urgent issues existing in the water supply and water removal systems is expected to be completed	State Committee for Water Resources	60 ml USD

11.Reconstruction and exploitation of Arpa-Sevan tunnel			State Committee for Water Resources	20.5 million USD
12. Reconstruction of community roads	Restoration of community/local roads	Restoration of 2919 km of community/local roads	RA Ministry of Transport and Communications	137.1 ml USD
13. Construction of a gravity feed water pipeline out of the Spandarian hydrostation pressure operated pipeline for the irrigation of Sissian irrigated lands		4330 hectares of land will become irrigated	State Committee for Water Resources	7.3 ml USD
14. Renovation, reconstruction and construction of new riverside containment and flood control facilities serviced by “Vorogum-Jrar” CJSC			State Committee for Water Resources	1.111 million USD
15. Melioration of saline lands in Ararat plateau and their utilization for agricultural purposes	<p>----1:1000 scale salt removal on an 5450 hectare area</p> <p>----Restoration of drainage networks on an area of 1120 hectares</p> <p>----Construction of a drainage system for an area of 3000 hectares</p> <p>----Desalination of 5450 hectares of saline lands</p> <p>----Restoration of irrigation systems on an area of 2450 hectares</p> <p>----Construction of irrigation systems for an area of 3000 hectares</p> <p>----Utilization of 5450 hectares of</p>	Desalination of 5450 hectares of land and their utilization for agricultural purposes	RA Ministry of Agriculture	144.1 ml USD

	land for agricultural purposes			
16. Restoration of the country's waste water treatment stations and construction of new ones as a priority		Restoration of waste water treatment stations in 6 settlements	State Committee for Water Resources	5160 ml drams
17. Development of alternative sources of energy	Creation of new types of high-capacity solar plants, Pilot – “Arev-100” plant with 350 kw capacity	Utilization of pollution-free new solar energy sources for supplying power to high-capacity stations	RA Ministry of Trade and Economic Development, Research Institute of Radiophysics	2 million USD
18. Upgrade and exploitation of radio-optical telescope - 54/2,6 facility	Increased precision of the facility	Ensuring super-distance satellite connection	RA Ministry of Trade and Economic Development, Research Institute of Radiophysics	1 million USD
19. Upgrade of radio and acoustic holography	Identification of distribution of radio and acoustic fields through measurements made at the object	Spatial data received on examined facilities	RA Ministry of Trade and Economic Development, Research Institute of Radiophysics	1.7 million USD
20. Preservation of the characteristics of antennas of unique primary benchmarks and gradient of angle of pitch of radio-wave phases	11 primary benchmarks with their equipment and ðàíãã	Maintenance of similarity of different antennas and characteristics of radio engineering equipment	RA Ministry of Trade and Economic Development, Research Institute of Radiophysics	1.2 million USD
21. Expansion of molybdenum utilization	Production of special molybdenum-alloy with high physical and mechanical characteristics; setting up a production	Introduction of special molybdenum-alloy production	RA Ministry of Trade and Economic Development, Research Institute	2.5 million USD (for R&D and testing), 35,0 million

			of Non-ferrous Metallurgy	USD for production
22. Synthesis of new water soluble porthyrins and its utilization in agriculture	Production of synthesis of new porthyrins to be used in production, testing porthyrins in large greenhouse conditions (for vegetable-growing), testing porthyrins on grain-crops and vegetables in field conditions	Root rot treatment of agricultural plants and 25-30% decrease of loss resulting from disease, Increasing fertility and growth: a) vegetables – by 10-15%, b) grains – 5-10%, Increase of greenery by 10-15%	“Biotechnology Research Institute” CJSC, Yerevan State Medical University, Yerevan State University, Armenian Agricultural Academy	4.5 million USD
23. Improvement of physical and mechanical characteristics (including abrasion resistance and durability) and utilization of cutting blades and other materials made from hard alloy	Research and scientific study, Production of samples, Manufacturing application, Welding of cutting blades on iron body	Manufacturing of tools for metal processing, cutting, mining, wood processing, stone, oil, gas production, output of artesian and mineral water, Development of synthesis matrix for filler production	RA Ministry of Trade and Economic Development	25 million USD
24. Technological processes for increasing durability of materials through dislocation, decrease of vacancy defect and increase of theoretical durability	R&D, Production of samples, Manufacturing application	Increasing durability, ductility and homogeneity of cutting materials and products	RA Ministry of Trade and Economic Development	20 million USD
25. Development of small energy facilities in RA regions	Establishment of a development fund, design estimates for small hydro-electric power stations	Optimal utilization of RA’s energy resources, Fostering business in marzes	RA Ministry of Trade and Economic Development	5 million USD
26. Development of leasing activities	Establishment of a leasing fund; Creation of a data base; assistance in creation of security/guarantee and after-sales	Technical equipment of agriculture and its processing industry, upgrade of machine equipment and vehicle pool,	RA Ministry of Trade and Economic Development	57 million USD

	services network	technical equipment of services sector, increased SME access to logistis		
27. Introduction of innovations and High-Tech in SMEs	Creation of venture funds; Fully guaranteed acquisition of patents and copyright protection; Improved mechanisms and techniques for introduction of innovative projects and high technologies	Increase in number of SMEs introducing innovations and high technologies and creation of new jobs, expanded range and variety of products, Increased SME competitiveness through quality assurance and reduced costs	RA Ministry of Trade and Economic Development	25 million USD
28. Handicraft development	State support for the sector; Creation of a network of centers; Recovery of the relate training system	Increase of employment rate up to 5%, Additional 2-3% economic growth at the final stage of the program	RA Ministry of Trade and Economic Development	40 million USD
29. Reconstruction and renovation of roads leading to tourist destinations from major highways and country roads	Renovation of following sections of roads leading to tourist destinations: to Haghpat – 5km, Sanahin – 5km, from Gyulagarak to neighboring villages and Sotchut – 10-15km, Yereruyk – 10-15km, Hamberd – 15km, Church of St.Mother of God in Arzni – 5km, Hagharcin – last 2km, Gladzor – 3-4km, Vorotnaberd – 5-6km, from Sisian to Sisavank – 3km, from Sisian to Zorats Kar – 8km, from Goris to Khndzoresk – 5km, section from Goght to Geghard, from Goris-Kapan highway to Tatev – 7km, from Alaverdi-Noyemberyan highway to Akhtala – 4-5km, from Gyumri to	Road improvement, Providing tourists with easy access to tourist destinations	RA Ministry of Trade and Economic Development	5.8 million USD

	Marmarashen – 9-10km, from highway to Odzun – 5km, to Goshavank – 6-7km.			
30. Installation of road signage in all RA regions	Placing road signage in the RA territory with multilingual names and appropriate symbols at settlements and tourist destinations	Placing of signage/pointers for tourist access to information and directions	RA Ministry of Trade and Economic Development	450 thousand USD
31. Waste removal from tourist destination areas	Waste removal in tourist destinations, placing dustbins and building lavatories	Ensuring compliance and maintenance of hygiene norms	RA Ministry of Trade and Economic Development	40 thousand USD
32. Implementation of “Tourism Development Program in RA Communities”	Within the framework of the program introduction of technology for tourism management	Introduction of technology	RA Ministry of Trade and Economic Development	130 million USD
33. Regional social and economic development	Select one rural community (with population of 1000) and one urban community (population of 5000) in each RA marz, Develop relevant infrastructure at selected locations to achieve quality of life meeting international standards	Creation of an attractive and model community to live and work; Development of other communities based on model community experience	RA Ministry of Trade and Economic Development	120 million USD
34. Construction of a water reservoir with 1 ml cubic meter capacity at the south foothills of Aragats mountain		1000 hectares of land will become irrigated	Armhydromet	1 ml USD
35. Development of bee-farming in support of vulnerable rural families	----Establishing bee-gardens ----Organizing trainings for beekeepers ----Establishing big bee farms in the marzes ----Providing swarm of bees to the poor families	Creating an income source for 1200 poor families through bee-farming	H.Javadyan Representative of PRSP SME working group	3 ml USD

36. Creating an administrative information system of the RA communities	<ul style="list-style-type: none"> ----Establishing administrative information registries for communities ----Establishing administrative information registries for marzes ----Improving RA countrywide administrative information registries ----Developing and introducing unified methodology for administrative information systems 	Introducing an administrative information system based on the existing RA administrative registries	RA Minister of Territorial Administration and Coordination of Infrastructure	4 ml USD
37. Creation and implementation of a RA state unified information system			RA Ministry of Transport and Communications	3.66 million USD
38. Renovation of Armenian railway lines and artificial structures			RA Ministry of Transport and Communications	29.2 million USD
39. Training and retraining of individuals with outdated education	<ul style="list-style-type: none"> ---Setting up distant learning classes ---Setting up online learning classes 		AUA Arm State Engineering University	17.7 million USD
40. Green Homeland Program (Through efforts of members of the organization and those involved in the forest industry and community work to recover (fir, oak, beech, lime, maple trees etc.) and enrich (apple, pear trees, raspberry, blackberry bushes etc.) forests. To ensure the ongoing nature and further enhancement of the program by expected income)	<ul style="list-style-type: none"> ---Constructing 2 workshops ---Purchasing 2 mini canneries ---Constructing sheds ---Training of workers 	Improvement of social conditions of refugees and disaster victims in vicinity of Stepanavan and Aparan water reservoir forest regions, restoration of forests	NGO Women Intellectuals for Environmental Protection	218 thousand USD
41. Establishing “Armenian Agricultural Corporations Union”		The main goal of the program is the optimal use of agricultural resources	“Armenia-Diaspora” fund	

42. Regulation of financial lending for housing construction		Addressing housing issues of young socially vulnerable families	L. Nazaryan	
43. “Professional Orientation Program”		Complex approach to addressing educational, training, housing and lifestyle issues of socially vulnerable families, the unemployed, the homeless and the adult inmates of orphanages.	L. Nazaryan	
44. Haven of Hope	Construction and furnishing of the compound Haven of Hope; creation of specialist teams; training and development of service methodology; delivery of alternative day services to the disabled, provision of social, psychological, legal, and professional consulting to parents and family members of the disabled; organization of conferences on disability and publication of scientific materials	Delivery of a complete set of day care services to the disabled, job creation for the disabled, full integration of the disabled into the society.	NGO Astghik representing parents of disabled children	7.152 ml USD (1.216 out of each is the contribution of the NGO)
45. Improvement of the Zoological Park	<ol style="list-style-type: none"> 1. Renovation of big cat cages 2. Renovation of the unfinished monkey cages 3. Water supply and irrigation systems made operable 4. Improvement of park paths 5. Fencing of the territory 		Zoo management	1 400 000 USD
46. Neutralization and utilization of chemical weed and pest killers in the ware houses of the Ministry of Agriculture	Moving and storing the chemicals Acquisition and installation of required and existing equipment Analytical Service and Scientific	Prevention of an environmental disaster	MIM ltd	6.06 ml USD

	Department			
47. Restoration of gas supply and gasification			“ArmRusGasProm” CJSC	
48. Creation of a High-Tech Center			Academic Center for Scientific Marketing	
49. Use of alternative engine fuels in the means of transport	Creation of a republican center for switch to alternative engine fuels in vehicles, which will support the whole process including: drafting a law, development of regulations and technical documents, guides and relevant promotion materials, organization of trainings and providing security measures	Saving 40 million USD annually on fuel expenses	Gas-engine National Association	182.5 million USD
50. Reconstruction of outdoor illumination network of Yerevan streets		Tourism development through increasing the attractiveness of the city Development of late afternoon and night trade	Yerevan municipality	8.786 million USD
51. Development of Yerevan urban transport sector	Purchase of 500 updated city buses and maintenance of city mini-bus shuttles	Improvement of passenger traffic by Yerevan public transportation, Increased accessibility of public transportation services for socially vulnerable sections of the population	Yerevan municipality	21.5 million USD
52. Development of Yerevan city educational sector		Improved teaching and learning in Yerevan city schools and effective management of the system	Yerevan municipality	1.45 million USD
53. Prevention and treatment of arterial hypertension in Yerevan city			Yerevan municipality	427 million AMD

54. Provision of equipment to Yerevan city's ambulatory polyclinics			Yerevan municipality	1.373 billion AMD
55. Construction of water reservoirs and wells		1200 hectares of additional irrigated areas, 30-40% increase in the production of agricultural products	Aragatsotn marz administration	
56. Construction and renovation of marz roads and bridges, installation of infrastructure			Aragatsotn marz administration	
57. Construction and renovation of flood release channels,			Aragatsotn marz administration	
58. Construction of local heating systems at 20 schools in 14 settlements of Aragatsotn marz that have gas supply			Aragatsotn marz administration	
59. ---Education ---Healthcare ---Social security ---Water supply and water removal ---Irrigation ---Inter-community road network ---Water reservoirs ---Support to SMEs			Syunik marz administration	
60. Construction of local heating systems at 33 schools of Syunik marz settlements that have gas supply			Syunik marz administration	
61. Construction of 6-7 water reservoirs with a capacity of 12 million cubic meters		2500-3000 hectares of additional irrigated areas	Vayots Dzor marz administration	
62. Reconstruction of 425 km out of 630 km of internal irrigation			Vayots Dzor marz administration	

network				
63. Reconstruction of 288 km of marz roads			Vayots Dzor marz administration	
64. Construction of treatment facilities for the three marz cities			Vayots Dzor marz administration	
65. Upgrade of the drinking water system			Vayots Dzor marz administration	
66. Reconstruction and equipment of schools			Vayots Dzor marz administration	
67. Construction of local heating systems at 14 schools of Vayots Dzor marz settlements that have gas supply			Vayots Dzor marz administration	
68. Construction of the Kaps water reservoir		Option 1: (70 million cubic meters) 12000 hectares of additional irrigated lands, 8 billion drams of additional income for the farmers Option 2: (45 million cubic meters) 8000 hectares of additional irrigated lands, 5.5 billion drams of additional income for the farmers	Shirak marz administration	I option:30 million USD II option: 20 million USD
69. Reconstruction of the Artic water reservoir		600 hectares of additional irrigated lands	Shirak marz administration	400 million drams
70. Reconstruction of 100 km of the following roads: Giumri-Amassia, Giumri-Anipemza, Giumri -Artik			Shirak marz administration	
71. Construction of gravity flow irrigation systems; renovation of internal networks; restoration of cattle watering facilities in mountains			Tavush marz administration	

72. Construction of small water reservoirs			Tavush marz administration	
73. Reopening of agricultural processing productions and starting new ones			Tavush marz administration	
74. Renovation of drinking water systems			Tavush marz administration	
75. Renovation and equipment of schools and cultural centers			Tavush marz administration	
76. Attraction of grant and credit resources to create new jobs			Tavush marz administration	
77. Improved drinking water supply			Armavir marz administration	
78. Improved irrigation water supply, renovation of 176,5 km of internal network			Armavir marz administration	
79. Desalination of 3050 hectares of salty lands			Armavir marz administration	
80. Construction of a water reservoir with a capacity of 60-70 million cubic meters in the administrative territory of Miasnikyan village		5000-6000 hectares of additional irrigated lands	Armavir marz administration	
81. Enhanced water retention capacity of the riverside water channel		Gravity fed irrigation for 35000 hectares of lands	Armavir marz administration	
82. Restoration of 208 km marz and community roads			Armavir marz administration	
83. Construction of local heating systems at 73 schools in Armavir marz settlements that have gas supply			Armavir marz administration	
84. Restoration of the Marmarik water reservoir			Kotayk marz administration	8 ml USD
85. Provision of gravity feed water			Kotayk marz	1.5 million

supply to 15 villages from the Armaghan spring			administration	USD
86. Construction of Yeghvard water reservoir			Kotayk marz administration	
87. Treatment of Hrazdan riverbed and Aghbjurak water reservoir			Kotayk marz administration	
88. Reopening of Sevaberd water reservoir		1200 hectares of additional irrigated lands	Kotayk marz administration	4.5 million USD
89. Improved drinking water supply to the city of Hrazdan		Uninterrupted water supply to Hrazdan, annual saving of 5 million kW/hour electricity	Kotayk marz administration	2 million USD
90. Restoration of sewerage collectors of Hankavan, Tsakhkadzor and Hrazdan			Kotayk marz administration	400 000 USD
91. Restoration of Yeghvard irrigation system		Increased access to irrigation for 1000 hectares of land	Kotayk marz administration	350 000 USD
92. Restoration of Proshyan irrigation system		Increased access to irrigation for 100-500 hectares of land	Kotayk marz administration	170 000 USD
93. Restoration of the 25 km road leading to Burakn			Kotayk marz administration	100 000 USD
94. Reconstruction of Getnik water reservoir		6000 hectares of additional irrigated lands	Lory marz administration	35 million USD
95. Construction of Aramnis and Dzoraget water reservoirs		Reduces irrigation water tariffs, creation of recreation zones, construction of small hydro stations, developing fish-breeding and others	Lory marz administration	83 million USD
96. Restoration of internal irrigation systems in the marz		Increased reliability of irrigation water supply and reduced losses	Lory marz administration	72 million USD
97. Construction of small water reservoirs		Increased reliability of irrigation water supply	Lory marz administration	8.6 million USD
98. Restoration of marz irrigation pipelines, construction of gravity		Increased reliability of irrigation water supply	Lory marz administration	65.4 million USD

feed systems		Reduced cost of irrigation		
99. Upgrade of water supply systems in Vanadzor, Spitak, Tashir, Allaverdi, Aghtala and a number of village communities		Increased and reliable supply of drinking water to the population	Lory marz administration	16.45 million USD
100. Upgrade of water removal systems in Vanadzor, Spitak, Tashir, Allaverdi, and Aghtala			Lory marz administration	13.83 million USD
101. Protection of environment		Reduced air and water pollution, improved sanitary conditions	Lory marz administration	820 000 USD
102. Construction of refuse facilities in Spitak and Alaverdi		Improved sanitary hygiene situation in Spitak and Alaverdi	Lory marz administration	275 000 USD
103. Capital renovation of Lori marz roads			Lory marz administration	17.5 billion drams
104. Capital renovation of Lori marz republican roads			Lory marz administration	8.42 billion drams
105. Construction of local heating systems at secondary schools in Lory marz		Heating of about 100 schools	Lory marz administration	1.5-2 million USD
106. Reforming village schools in Lory marz and creating guarantees for their sustainable development	Creation of support agricultural farms at 100 village schools of Lory marz, Cultivation of 300-350 hectares of land, Construction of irrigation systems, Purchase of farming plants, equipment, seeding-machines, fertilizers and pesticides, Establishing bee-gardens, Training on bee-farming, Purchase of bee swarm for cattle-breeding,	Creation of additional income sources for 100 school villages of the marz, Upgraded equipment of teaching laboratories and cabinets, Computer classes, Development of an information network, Creation of 3000 new jobs, Training of 3000 high-school students and providing basic knowledge and experience in	Lory marz administration, «Lory School» Fund	2.5 million USD

	Purchase of buildings, premises and cattle, Processing and sales of production	farming		
107. Improved building premises for kindergartens in rural communities and large neighborhoods of city communities of Lory marz	Layout-planning work; Construction of new buildings; Capital renovation of buildings in emergency conditions	Providing normal conditions for pre-school education; Inclusion of 1500 children in pre-school education	Lory marz administration	4.5 million USD
108. Measures to ensure the healthy reproduction of the generation in border areas and communities distant from main roads, improve primary maternal health care and disease prevention in Lory marz	Written and verbal promotional activities, diagnostics and consulting services, Provision of small healthcare libraries (10 books), hygiene and personal care products to 1000 families, Increased circulation (1000 copies) of “Speghani” newspaper of Vanadzor Medical College and its free distribution to the population, Presentations for parents, young married couples and high school students, Setting up 10 temporary consulting centers of maternity and child care, Series of radio and TV broadcasts and debates (round tables) – 5 events, Construction of 5 simple sports playgrounds	1000 families will get minimal healthcare knowledge, which in turn will significantly increase their healthcare culture and families will pay more attention to basic health protection needs, 1200 people in border zones and remote communities will be diagnosed and provided with necessary consultations, Birthrate of children with poor health and child mortality rate will decrease by 20-30%, Improved health conditions of the growing generation, Parents will be more attentive towards reproductive health of the generation, Healthy lifestyles will be enrooted, Creation of a healthcare databank for the residents of 20 communities	“Tagavoranist” NGO	63 million AMD
109. Legal awareness program for the Lori marz local leadership.	1. Mini trainings for local leaders	Increased legal awareness of community leaders will	Lori marz administration,	24800 USD

Increased efficiency of local governance through legal awareness	<ol style="list-style-type: none"> 2. Thematic discussions by local TV channels 3. Legal consulting for local leaders 	promote involvement in local governance, will restore self-confidence and belief in the future of the country, will help to overcome individual's alienation from state	Armenian Constitutional Advocacy Center	
110. Construction of a new school building in Vanadzor for the Human Rights School	<p>The following activities have been planned: (development area – 1000 square meters, total area – 3775 square meters, construction volume- 12600 square meters)</p> <ol style="list-style-type: none"> 1. tasking the design organization with preparation of the working design based on the technical assignment (SOW) 2. Construction <ul style="list-style-type: none"> ---General Construction ---Engineering ---Interior 	The construction of the Human Rights School in Vanadzor will support educational and cultural development of regions alongside with Yerevan	Lori marz administration, Armenian Constitutional Advocacy Center	775,000 USD
111. Restoration of irrigation systems; restoration of drinking water system; upgrade of marz and inter-marz roads; construction of sewerage treatment stations in Vardenis, Martuni, Vardenik and Gavar; reconstruction and construction of education, health and cultural centers			Gegharkunik marz administration	
112. Construction and equipment of schools, pre-school institutions, culture centers, sport schools and sport playgrounds; capital renovation and equipment of			Ararat marz administration	

hospitals and polyclinics in 4 of the marz cities, rural ambulatories; restoration of drinking water network; construction of water removal systems, water supply to newly constructed districts; restoration of irrigation systems; construction of water reservoirs; desalination of lands; construction of waste water removal systems in the cities of the marz; installation of telephone communication in a number of cities; renovation of inter-community and in-community roads and bridges; completion and exploitation of unfinished and multi-unit apartment buildings				
113. Reconstruction of the Martuni-Nerkin Getashen road	Reconstruction of the road	Reconstruction of the 15 km road	Zohrab Shahinyan President of youth NGO Shahan	80 000 USD
114. Rebuilding of Stepanavan City devastated economy	Renovation of water pipeline and sewerage system, streets renovation, outdoor lighting restoration, in- and intra-community highways renovation		Stepanavan Municipality	
115. Flat, iron and tied roof capital renovation of multi-unit apartment buildings in Echmiadzin City		Improved conditions for living in multi- apartment building	Echmiadzin Municipality	338.652 mln AMD, with 10% or 33.865 mln AMD co-financing
116. Roof renovation for Ararat City multi-apartment buildings			Ararat Municipality	372.329 mln AMD, out

				of which 22.396 mln AMD is community investment
117. Roof renovation for Ararat City public multi-apartment buildings			Ararat Municipality	43.69 mln AMD, out of which 0.932 mln AMD is community investment
118. Inter-town road renovation in Aparan			Aparan Municipality	85 mln AMD, out of which 3.5 mln AMD is community investment
119. Aparan City water supply and water removal internal network restoration			Aparan Municipality	500 mln AMD
120. Roof renovation program for 9 and 5 floor multi-apartment buildings in Ijevan City			Ijevan Municipality	111.5 mln. AMD
121. Asphalt covering for 11000 sq.m of Aslanyan and Metaghagortsneri streets in Ijevan City			Ijevan Municipality	53.87 mln. AMD
122. Construction of 40-room hotel in Ijevan City			Ijevan Municipality	159.9. mln. AMD
123. Potable water internal pipeline capital renovation program in 1 st , 2 nd , 3 rd , 4 th and 6 th micro-districts of Abovyan City			Abovyan Municipality	110.7 thousand USD

124. Flat and gable roof capital renovation in multi-apartment buildings of 1st, 2 nd , 3 rd and 4 th micro-districts of Abovyan City			Abovyan Municipality	502.3 thousand USD
125. Renovation and construction of flood control facilities in Sevan City			Sevan Municipality	45 mln. AMD, where 10% is community investment
126. Gortsaranajin street (connecting Sevan City lakeside and peninsula) unfinished bridge capital construction			Sevan Municipality	66 mln. AMD, where 10% is community investment
127. Construction of roads connecting Sevan City Cheremushka and Nor Tagh districts			Sevan Municipality	31 mln. AMD, where 10% is community investment
128. Artik City Stadium reconstruction program			Artik Municipality	84.7 mln. AMD
129. Roofs and entrances renovation for 69 multi-apartment buildings in Sisian City			Sisian Municipality	400.4 mln. AMD
130. Multi-apartment buildings roof renovation in Ajapnyak, Dzakhapnyak and Kechut districts of Jermuk City			Jermuk Municipality	240-250 mln. AMD, community participation 5-10%
131. Renovation of Kapan City Dzorq district Daily Regulating			Kapan Municipality	7.284 mln. AMD

Water Reservoir				
132. M. Zhapyan street pot hole reconstruction in Kapan City			Kapan Municipality	24.033 mln. AMD
133. Multi- apartment buildings flat and gable roof capital renovation in Alaverdi City			Alaverdi Municipality	140 thousand USD
134. Capital renovation of water pipeline and sewerage internal network in Alaverdi City			Alaverdi Municipality	4 mln USD
135. Reinforcement of N12 emergency building in Sanahin Station district			Alaverdi Municipality	25 mln. AMD
136. Construction of 0.2 mln. cubic meters water reservoir in Melik village, Aragatsotn marz		Provision of necessary irrigation water for Melik village farming	Melik Village Administration	207.7 thousand USD
137. Establishment of high-speed telecommunication network			“Partnership for Open Society” Initiative	
138. Timber resources restoration program			“Partnership for Open Society” Initiative	
139. Development of public monitoring concept for the proposals			“Partnership for Open Society” Initiative	
140. Public roads construction and renovation			“Partnership for Open Society” Initiative	I version: 186 mln. USD; II version – 135 mln. USD; III version 90 mln. USD
141. Installation of local heating systems at public secondary schools		Ensuring necessary length of academic year and education	“Partnership for Open Society”	

		quality, improving next generations' health	Initiative	
142. Establishment of museum devoted to Armenian traditional way of life "Armenian's Hearth"	To construct a premise with 7m x 9m total area adjacent to "Kzher" and coated with Armenian tuff scrap	Ensuring national patrimony through cultural heritage	Samvel Arakelyan "Kzher" art salon	8.5 thousand USD
143. Project proposal aimed at ensuring stable economic growth and poverty reduction in rural communities of the RA	Phase I Inventory of rural organic waste; inventory results analysis; as a result of the analysis biogas stations capacity selection and optimal positioning Phase II Feasibility study for program implementation Phase III Design and construction of 10 pilot stations	Provision of alternative energy source; increase of cultivating land fertility, pasture productivity improvement, deforestation reduction.	"SHGHTA" NGO, "Gas-Engine National Association" NGO, "GasJerSarqer" Ltd	Phase I – 10 thousand USD; Phase II – 10 thousand USD; Phase III – 1 mln. USD
144. Establishment of food security system and capacity building	Rent of space for laboratories, procurement of equipment, professional training	Increase of quality and security of the food consumed in the Republic of Armenia	"Friends of Nature" NGO	1672 thousand USD
